

ISSUE No. 6 · SEPTEMBER 2026

The ClimeNergies Digest.

*A monthly news roundup across Nigeria, Africa & the world.*OIL & GAS · POWER & RENEWABLES
CRITICAL MINERALS · CLIMATE & ESG

THIS MONTH'S TOP STORIES

01 NIGERIA

Nigeria wins arbitration as Sunrise's \$400m Mambilla claim is dismissed

The 17 September ruling removes a major legal obstacle to the 3,050MW hydropower project after nearly two decades of delays.

02 AFRICA

Dangote breaks ground on a \$16bn East African refinery in Kenya

Modelled on the Nigerian plant, the project aims to cut East Africa's fuel import bill as Kenya and Uganda prepare to produce crude.

03 GLOBAL

IEA: oil supply shock deepens as Brent tops \$113

The IEA expects 2026 supply to fall 5.7 mb/d on Middle East disruption, with diesel above \$200/bbl and stocks down 95m barrels in August.

KEY EVENTS · OCTOBER 2026

LOCAL · NIGERIA

Oct 6–8 NiHMEC 2026, Lagos

Oct 14–16 Nigeria Climate & Carbon Market Summit, Abuja

Oct 27–29 Nigeria Energy 2026, Lagos

REGIONAL · AFRICA

Oct 12–16 African Energy Week, Cape Town

Oct 13–15 Pan-African Sustainability Conference, Accra

Oct 28–30 EIK Climate Financing Frontiers, Mombasa

GLOBAL

Oct 6–7 Hydrogen Americas Summit, Houston

Oct 13–15 The Battery Show North America, Detroit

Oct 27–29 Asia Clean Energy Summit, Singapore

LOCAL · NIGERIA

Amni and TotalEnergies take an \$800m offshore gas project to FID, Nigeria wins the Mambilla arbitration, and a \$300m off-grid fund moves into deployment.

IN THIS SECTION

→ Oil & Gas

an \$800m gas FID, NLNG's Train 7 timeline, a \$3bn+ FLNG plan and a 2028 end date for regulated gas prices.

→ Power & Renewables

the Mambilla ruling, a \$300m off-grid fund, NERC's CapEx order and two state regulators flexing new powers.

→ Critical Minerals, Climate & ESG

a Nigeria-US mining framework, deaths in NSCDC custody, IFRS S1 and S2 go live, and gas flaring at a ten-month high.

“

With a \$400m claim off Mambilla and a \$300m fund now deploying off-grid, September was about clearing the path for capital at both ends of Nigeria's power system

— *The ClimeNergies Digest · September 2026*

BY THE NUMBERS

3,050MW

Capacity of the Mambilla hydropower project, cleared of the Sunrise claim on 17 September

OIL & GAS

NIGERIA

01 Amni and TotalEnergies approve \$800 million offshore gas project

NNPC Ltd has announced that a proposed \$800 million offshore natural gas project by local producer Amni International and TotalEnergies has reached a final investment decision, one of the largest recent investments in Nigeria's upstream gas sector.

→ [Read the full story](#)

02 NLNG targets Train 7 start-up by end-2027

Nigeria LNG aims to start up its \$10 billion Train 7 project by the end of 2027, Managing Director Adeleye Falade told reporters on the sidelines of the Gastech conference in Bangkok.

The Bonny Island project will expand NLNG's capacity from 22 million to 30 million tonnes per year. It has faced repeated delays, most recently from the COVID-19 pandemic and the Ukraine war.

→ [Read the full story](#)

03 Dangote refinery IPO attracts strong investor demand

Dangote Group says the IPO of its Lagos refinery has attracted enormous investor demand, as the company continues to develop the refinery and its expansion plans.

→ [Read the full story](#)

04 NIPCO plans \$3 billion+ FLNG project to boost gas monetisation

NIPCO Group plans to develop a Floating Liquefied Natural Gas (FLNG) project estimated at more than \$3 billion to boost gas monetisation and supply in Nigeria, NIPCO Gas Managing Director Nagendra Verma disclosed in Abuja on 24 September 2026.

The project would mark NIPCO's entry into LNG. Feasibility studies and preliminary assessments are under way to determine its technical and commercial requirements.

→ [Read the full story](#)

05 Federal Government to end regulated gas pricing by 2028

Nigeria is set to end regulated pricing in the domestic gas market by 24 September 2028, as the NMDPRA targets a transition to a fully established willing-buyer, willing-seller framework.

NMDPRA Chief Executive Rabiul Umar said at the Gas Market Maturity Workshop in Abuja that the transition will be based on measurable conditions demonstrating the maturity of each market segment, in line with the Petroleum Industry Act.

06 Nigeria hits 1.68mbpd, sustains OPEC quota for four months

Crude oil and condensate production rose to 1,677,777 barrels per day in August 2026, up 0.4% from 1.67 million bpd in July, as Nigeria sustained compliance with its OPEC quota.

According to the NUPRC, crude oil production excluding condensates stood at 1,500,190 bpd in August.

→ [Read the full story](#)

07 OB3 pipeline ready for first gas, AKK hits 95%

NNPC says the Obiafu-Obrikom-Oben (OB3) gas pipeline is ready for first gas, with pre-commissioning at the River Niger Crossing completed in August, according to its July 2026 monthly report.

The Ajaokuta-Kaduna-Kano (AKK) pipeline is 95% complete and expected to deliver early gas to Abuja in 2026.

POWER & RENEWABLES

NIGERIA

01 Mambilla back on track as Nigeria wins \$400 million arbitration

An international tribunal has dismissed a \$400 million claim by Sunrise Power and Transmission over the long-delayed Mambilla hydroelectric project. The 17 September ruling removes a major legal obstacle to the 3,050MW scheme, potentially reviving Nigeria's largest hydropower project after nearly two decades of delays.

→ [Read the full story](#)

02 FG unveils \$300m fund for off-grid power

The Nigeria Sovereign Investment Authority (NSIA), Africa50 and Sustainable Energy for All have commercially launched the \$300m Nigeria Distributed Renewable Energy Fund on the sidelines of the UN General Assembly.

Jointly managed by NSIA and Africa50, the fund will mobilise public and private capital for mini-grids, standalone solar and other decentralised projects, and now moves from structuring to active capital deployment.

→ [Read the full story](#)

03 FG to deploy 300 containers of grid equipment

Minister of Power Joseph Olasunkanmi Tegbe says the Federal Government will install 300 containers of critical equipment to upgrade transmission nationwide. The next phase will deepen grid stabilisation along the Lagos, Enugu-Port Harcourt and Abuja-Kaduna-Kano corridors, with technical audits to identify weak points and guide investment.

→ [Read the full story](#)

04 NERC orders DisCos to channel 60% of OpEx into CapEx from 2027

A new NERC Order directs DisCos to allocate up to 60% of earned Non-Administrative OpEx to capital expenditure from the February 2027 market cycle.

DisCos without outstanding debts will remit 60% to dedicated CapEx accounts and 40% to operations. Those with debts will remit 30% to CapEx and 20% to operations, with 50% applied to obligations owed to NBET and the Market Operator.

→ [Read the full story](#)

05 Energy inflation climbs to 4.69% after July low

Nigeria's energy inflation rose to 4.69% in August 2026 from 4.40% in July, according to the NBS. Headline inflation eased marginally to 15.39% from 15.43%, a third consecutive month of disinflation.

→ [Read the full story](#)

06 LASERC licenses Elektron's 40MW Victoria Island power project

The Lagos State Electricity Regulatory Commission has granted an operational licence to Elektron Energy Development for its 40MW Victoria Island Power project, which is scheduled for commercial operation in December 2026 to supply dedicated power to businesses on the Island.

→ [Read the full story](#)

07 Edo gives unlicensed electricity operators 30-day deadline

Order No. ESERC/ORDER/2026/001, dated 11 September 2026, requires anyone operating in Edo's electricity market without a licence or permit to cease and apply for approval within 30 days.

No person may engage in generation, transmission, distribution, supply, trading, power exchange, or system and market operation in Edo without a licence or permit issued, or deemed issued, by the Commission.

→ [Read the full story](#)

08 3D NNPC Biofuels to build €256m bioethanol plant in Lagos

The Ogun–Osun River Basin Development Authority and 3D NNPC Biofuels Limited have signed a Memorandum of Understanding in Abeokuta for a €256m bioethanol plant at Itokin, Lagos State. The Authority will provide 200 hectares at its Itokin project site for the plant, and 15,000 hectares of arable land across Lagos, Ogun, Osun and Oyo states for large-scale cassava cultivation as feedstock.

Managing Director Adedeji Ashiru described the agreement as a major step towards Nigeria's energy and food security, saying it would support industrialisation, create jobs and unlock the value of underutilised government assets.

→ [Read the full story](#)

01 Nigeria and US sign mining framework

Minister of Solid Minerals Development Dele Alake and US Deputy Secretary of State Christopher Landau signed the agreement in New York. It covers geological data, exploration, mineral development and processing, infrastructure and technical capacity building.

→ [Read the full story](#)

02 Nigeria announces three US-linked mining partnerships

Partnerships involving Promethean Resources, Vermeer, Renewvia Energy and Terra Industries target mining technology, renewable power for mining and processing, and site security. Speaking at the US-Nigeria Strategic Investment Dialogue, Minister of Industry, Trade and Investment Dr Jumoke Oduwole said the deals are expected to drive technology transfer, local value addition and job creation.

→ [Read the full story](#)

03 Nigeria bets on grants to unearth mineral riches

The Solid Minerals Development Fund will issue grants covering up to 70% of exploration costs for licence holders, with junior miners the stated target. The programme is part of a wider push to capture a larger share of African mining investment.

→ [Read the full story](#)

04 Suspected illegal miners die in NSCDC custody in Niger State

At least 35 suspected illegal miners, with some reports putting the toll at 37, died on 15 and 16 September while in the custody of the Nigeria Security and Civil Defence Corps (NSCDC) along the Wushishi/Lukoto axis of Niger State.

The NSCDC Commandant General has ordered a high-powered investigation into the arrests, detention conditions and medical care provided. The cause of death awaits medical and laboratory confirmation at General Hospital, Minna.

Relevance: the incident puts enforcement against illegal mining, and the treatment of artisanal miners, under scrutiny just as Nigeria courts US and other foreign mining investment.

→ [Read the full story](#)

05 Nigeria begins implementing IFRS Sustainability Disclosure Standards

The SEC has alerted public companies and significant capital market operators to Nigeria's adoption of IFRS S1 (general sustainability disclosures) and IFRS S2 (climate-related disclosures), under the Investments and Securities Act 2025. The FRCN, working with the SEC and other stakeholders, has developed a roadmap for phased implementation.

→ [Read the full story](#)

06 NGX begins N-Zero corporate baseline assessments

NGX Group has started corporate baseline assessments under its N-Zero initiative, launched in January with DEG Impulse and Africa Foresight Group to help companies move from climate ambition to practical action.

The assessments will map each company's readiness across climate-risk management, emissions measurement and reporting, target-setting, transition planning and carbon-market opportunities. More than 50 companies, including major banks, industrials and energy businesses, have reportedly engaged.

[→ Read the full story](#)

07 Gas flaring hits 7.48% in August, highest since October 2025

NUPRC data shows flared gas rose to 18,350.55 MMSCF in August 2026, even as gas utilisation remained high at 92.5%, with 227,088.59 MMSCF used for field operations, domestic supply and exports.

REGIONAL · AFRICA

Dangote breaks ground on a \$16bn refinery in Kenya, Egypt signs for 1GW of wind, and Washington deepens its minerals ties with Kinshasa and Nairobi.

IN THIS SECTION

→ Oil & Gas

Uganda names its crude, Dangote heads east, and Oilserv takes two Gabonese blocks.

→ Power & Renewables

an offshore wind delay in South Africa, a UN grids accelerator, a sovereign guarantee for C&I power and a 1GW Egyptian PPA.

→ Critical Minerals, Climate & ESG

a DRC one-stop mining agency, Lohum's first Zimbabwe lithium, fresh clean cooking finance and \$20m for green hydrogen.

“

Dangote's move into Kenya exports a Nigerian industrial model, not just a refinery: build at scale where the region still imports its fuel

— *The ClimeNergies Digest* · September 2026

BY THE NUMBERS

\$16bn

Estimated cost of the Dangote refinery in Kenya, where construction begins on 30 September

OIL & GAS

AFRICA

01 Uganda names its crude "Pearl Sweet" ahead of first oil

Uganda has named its blended crude grade ahead of the planned start of commercial production by year-end, two decades after discovering reserves along the Albertine rift on its border with the DRC.

→ [Read the full story](#)

02 Dangote breaks ground on \$16 billion East African refinery in Kenya

Aliko Dangote and President William Ruto break ground on 30 September on a refinery modelled on the group's 700,000 bpd Nigerian refinery, aimed at lowering East Africa's fuel costs and saving hard currency spent on imported products as Kenya and Uganda prepare to produce crude.

→ [Read the full story](#)

03 Gabon signs agreement with Nigeria's Oilserv to develop two blocks

The Agreement Protocol covers the DEF-3 and D4-5 blocks and provides for gas transportation, compression and treatment infrastructure to support power generation and industry in Gabon.

→ [Read the full story](#)

POWER & RENEWABLES

AFRICA

01 South Africa's first offshore wind farm delayed

The environmental impact study for the 800MW Gagasi project off Richards Bay has stalled pending new technical information from developers. The project was launched in 2022 by GenesisHexicon, a joint venture between Sweden's Hexicon and South Africa's Genesis Eco-Energy Developments.

→ [Read the full story](#)

02 UN launches Global Grids Accelerator for Africa and Southeast Asia

Announced by UN Secretary-General António Guterres ahead of the UN Climate Summit 2026, the Accelerator will turn government grid priorities into investable, operational projects, tackling the growing mismatch between renewable generation and transmission capacity.

→ [Read the full story](#)

03 Norway guarantee backs Lyra Energy's C&I power platform

Lyra Energy, owned by Scatec and STANLIB Infrastructure Investments, has secured a payment guarantee backed by the Norwegian State under Norad's Sovereign Guarantee Scheme for Renewable Energy. The facility improves the bankability of Lyra's commercial and industrial offtake portfolio.

→ [Read the full story](#)

04 Egypt signs PPA for 1GW Ras Shokeir wind project

Infinity Power and Hassan Allam Utilities Energy have signed a PPA with the Egyptian Electricity Transmission Company for the 1GW Ras Shokeir wind project in the Red Sea Governorate, a major step in expanding Egypt's renewable capacity.

→ [Read the full story](#)

01 Congo plans centralised mining investment agency under US deal

The DRC, the world's largest cobalt and second-largest copper producer, is preparing a one-stop agency for major mining investments as part of reforms linked to its minerals partnership with the US, aiming to attract more Western capital into a sector dominated by Chinese companies.

→ [Read the full story](#)

02 India's Solar Industries to buy South Africa's Omnia for \$1.36 billion

The all-cash deal, subject to regulatory and shareholder approvals, will expand the explosives maker's global mining business.

→ [Read the full story](#)

03 US to help develop Kenya's critical minerals processing

Kenya is considering bids to develop the coastal Mrima Hill deposit, expected to hold tens of billions of dollars' worth of rare earths and niobium, amid US-China rivalry over critical minerals.

→ [Read the full story](#)

04 India's Lohum ships first lithium ore from Zimbabwe

Lohum holds rights to 10 lithium blocks covering about 1,100 hectares in Matabeleland South, with an estimated 30 to 40 million tonnes of ore. The assets could support around 300,000 tonnes of lithium carbonate equivalent, worth about \$7 billion at current prices.

→ [Read the full story](#)

05 Clean cooking push for Africa draws \$900m in new pledges

The IEA reports \$900 million in new commitments on top of the \$2.2 billion pledged at the 2024 Summit on Clean Cooking in Africa, with more than \$700 million already deployed across 28 countries. The second summit will be held in Nairobi on 27 and 28 January 2027.

→ [Read the full story](#)

06 IFAD and Equity launch \$200m adaptation fund for farmers

The Africa Rural Climate Adaptation Finance Mechanism (ARCAFIM), a private sector-led facility for smallholder farmers and rural businesses across East Africa, was launched at the Africa Food Systems Forum 2026 in Kigali.

→ [Read the full story](#)

07 CCDA-14 opens with a push from climate pledges to implementation

The Fourteenth Conference on Climate Change and Development in Africa opened in Addis Ababa, convened by ClimDev-Africa partners UNECA, the AfDB and the African Union Commission.

→ [Read the full story](#)

08 AfDB commits \$20m to four green hydrogen projects

Projects in Egypt, Morocco, Namibia and South Africa represent an estimated \$23bn of investment, 20GW of renewable capacity and 7GW of electrolyzers.

GLOBAL

Brent tops \$113 as Middle East supply stays constrained, coal demand heads for a record, and copper sets new highs on tariffs and electrification.

IN THIS SECTION

→ Oil & Gas

the IEA's supply shock, record coal demand, a final SPR release and two long-term LNG commitments.

→ Power & Renewables

Solar for All reinstated, €700m for EU grid manufacturers and \$2bn for US transmission.

→ Critical Minerals, Climate & ESG

a UN minerals mechanism that includes Nigeria, record copper, CBAM under challenge, EU methane rules in doubt and slimmer ESRS.

“

The oil shock is doing what climate policy struggled to do: turning electrification into an energy security argument

— *The ClimeNergies Digest* · September 2026

BY THE NUMBERS

\$113.48/bbl

Brent on 9 September, as diesel moved above \$200/bbl (IEA Oil Market Report)

OIL & GAS

GLOBAL

01 IEA: oil supply shock deepens as Brent tops \$113

The IEA's September Oil Market Report expects 2026 supply to fall by 5.7 mb/d because of Middle East disruption. Brent reached \$113.48/bbl on 9 September, diesel went above \$200/bbl, and global stocks fell by 95 million barrels in August. Demand is expected to fall by 2.5 mb/d this year.

→ [Read the full story](#)

02 Global coal demand heads for a record

The IEA expects coal demand to rise 1.2% in 2026 to a record 8.94 billion tonnes, as disrupted LNG flows through the Strait of Hormuz push countries back to coal for power.

→ [Read the full story](#)

03 IEA urges stronger gas security after repeated supply shocks

The IEA says the EU's phase-out of Russian gas opens new supply options for Central and Eastern Europe, and has urged governments to make gas supply more resilient.

→ [Read the full story](#)

04 US to release a final 40m barrels from its Strategic Petroleum Reserve

The contribution to the IEA-coordinated release following the Iran conflict takes the SPR below 284m barrels, its lowest level since 1982.

→ [Read the full story](#)

05 Shell-led LNG Canada approves \$33bn Phase 2 expansion

The final investment decision will double LNG Canada's export capacity to 28 mtpa, a sign of continued investment in long-term gas infrastructure.

→ [Read the full story](#)

06 Cheniere signs 22-year LNG supply deal with Petrobras

Petrobras will buy about 0.8 mtpa of LNG, which it says will reduce its exposure to market swings and improve supply security and flexibility.

→ [Read the full story](#)

01 Judges rule EPA unlawfully cancelled \$7 billion SolarforAll programme

Two federal judges found that the EPA's cancellation of the Inflation Reduction Act programme, which funds solar for over 900,000 low- and moderate-income families, violated federal funding laws and the separation of powers.

Judge Mary S. McElroy ordered the funds reinstated, while Judge Tanya Chutkan sided with Harris County, Texas.

→ [Read the full story](#)

02 EIB and BNP Paribas sign €700 million grid guarantee deal

Backed by €350 million in counter-guarantees from each party under InvestEU, the portfolio supports European grid manufacturers and is expected to stimulate up to €2.8 billion of investment, as part of a wider €1.5 billion grid package.

→ [Read the full story](#)

03 US commits \$2bn to modernise its ageing grid

The DOE is funding 31 projects across 26 states, covering more than 21,000 miles of transmission lines and adding over 23GW of capacity through grid-enhancing technologies.

→ [Read the full story](#)

01 UN critical minerals support mechanism includes Nigeria

The UN Secretary-General has launched a Country Support Mechanism for Guinea, Indonesia, Madagascar, Nigeria, Zambia and Zimbabwe, offering technical help to strengthen governance and process more minerals domestically.

→ [Read the full story](#)

02 Copper hits record highs

Comex copper reached \$6.83/lb (about \$15,057/t) on 22 September, driven by expected US tariffs on refined copper and demand from electrification and AI data centres.

→ [Read the full story](#)

03 Peru targets 1 million tonnes of copper boost as it cuts red tape

Energy and Mines Minister Guillermo Shinno says output will stay at 2.5 to 2.7 million tonnes this year due to declining ore grades and social conflict. The government has identified 27 mining permits that could be eliminated as Chinese and US firms line up projects.

→ [Read the full story](#)

04 WTO sets up panel on Russia's challenge to EU CBAM

Russia argues the EU's Carbon Border Adjustment Mechanism is discriminatory and protectionist and has asked the WTO to rule on whether it breaches international trade rules.

→ [Read the full story](#)

05 Canada to develop carbon removal market framework under Article 6

The framework would set accounting and authorisation rules so Canadian carbon removal credits, including from direct air capture pioneers such as Deep Sky, can become international assets and reach more buyers.

→ [Read the full story](#)

06 Climate finance concerns dominate UN talks ahead of COP31

UNGA discussions highlighted the gap between ambition and accessible finance for developing countries. The UK announced £331m for climate and biodiversity, while the EU and Canada announced new ocean funding.

→ [Read the full story](#)

07 EU lawmakers move to scrap CBAM's emergency brake

The European Parliament voted to delete a clause allowing the EU to suspend the levy if "serious and unforeseen circumstances" raise import prices, proposing instead to use CBAM revenue to compensate affected industries. This sets up a clash with member states.

→ [Read the full story](#)

08 EU considers postponing methane rules for oil and gas imports

The world's first law on methane from imported fossil fuels is due to take effect in January 2027, requiring foreign suppliers to monitor and report emissions, with fines of up to 20% of annual turnover and an intensity limit from 2030. France, the US and others fear it could undermine energy security.

Relevance to Nigeria: significant for NLNG and upstream exporters, as methane measurement and intensity increasingly shape access to the EU market.

→ [Read the full story](#)

09 EU countries back ETS changes to curb carbon price spikes

Governments agreed to keep more spare permits in the Market Stability Reserve as a buffer that can be released to counter price spikes.

→ [Read the full story](#)

10 Revised European Sustainability Reporting Standards published

Adopted under the Omnibus I simplification, the revised ESRS cut mandatory datapoints by more than 60%. They enter into force on 10 November 2026 and apply to financial years beginning on or after 1 January 2027.

→ [Read the full story](#)

11 84% of asset owners now build sustainability into investment strategy

FTSE Russell's 2026 Asset Owner Survey shows the share up from 73% in 2025, with governance now a leading sustainability priority.
